

**Department of Health and Hospitals  
Request for Proposals for Consulting Services  
Pre-Hazard Mitigation Planning**

**Proposer Questions and DHH Responses**

1. Does DHH intend to utilize any funding from the Federal Emergency Management Agency (FEMA) to wholly or partially fund this project?

*No. FEMA have not been made available to us for this project.*

2. What is the total amount DHH has budgeted for the proposed project?  
Has DHH established a budget range for this proposal?

*DHH declines to respond to this question at this time. We do not want to encourage or discourage competition based on the amount of money that may be available. Should all proposals come in at a cost higher than what is expected, we may, as the RFP states, elect to fund only some of the tasks, or we may seek additional funding.*

3. What parishes/jurisdictions are identified to be the “affected areas?”

*Clearly, all coastal parishes are at high risk as well as those that are prone to hurricane damage by virtue of their location relative to waterways. DHH would also include the other parishes or portions of parishes falling below Interstate 12 from the eastern edge of the state to Baton Rouge, and those south of Interstate 10 from Baton Rouge to the western boundary of the state. Please refer to the “Louisiana Emergency Evacuation Map” cited in the RFP at Part II: Project Overview, Item A.*

4. What cost-benefit model will be utilized related to assessing the adoption of policies?

*DHH expects the selected contractor to recommend the most appropriate assessment model.*

5. How many facilities under the jurisdiction of DHH are designated to be physically reviewed (onsite inspection required) as indicated in the RFP, Part II, B.1., last sentence?

*DHH expects to designate up to ten specific facilities to be reviewed. The contractor will, using scientific sampling techniques, designate others. DHH would expect to work with the contractor through this process.*

**Department of Health and Hospitals  
Request for Proposals for Consulting Services  
Pre-Hazard Mitigation Planning**

**Proposer Questions and DHH Responses**

6. Is it the intent of the Technical Guidance Document to provide a decision tree matrix for each facility or a "standard" matrix that can be applied to all facilities?

*We envisioned a general decision matrix that could be applied by each individual facility. If the contractor determines that one model is sufficiently comprehensive and flexible to provide guidance, then that would be acceptable. If, however, the contractor determines that more than one matrix is required to provide guidance, then more would be appropriate. The intent was not to develop a model for each individual facility.*

7. Are building code retrofit suggestions/requirements developed by the contractor mandatory for facility owners/managers to comply with?

*Once adopted in the Louisiana Register, building codes, including requirements for retrofitting, will have the force of law. The process for adoption of regulations includes time for public input and for legislative approval.*

8. Will DHH publish the list of companies that have notified their intent to submit a proposal?

*No, we would not want to do anything that might be construed to impede the competitive process. A list of proposers may be requested upon award of the contract.*

9. Will the contractor have state-sanctioned access to healthcare facility personnel and patients, fire and police personnel, Louisiana and local emergency management and homeland security personnel, etc., i.e., those people who were on the ground during and/or after Katrina and Rita?

*Also, will the state pave the way for consultants to interview individuals who were involved in prior mitigation planning, response and recovery?*

*DHH personnel will be available for interviews and the Department will provide letters of introduction to other state and local agencies, including but not limited to public entities, the Louisiana Hospital Association, and the Louisiana Nursing Home Association. Should resistance be encountered, DHH will work diligently to facilitate access.*

**Department of Health and Hospitals  
Request for Proposals for Consulting Services  
Pre-Hazard Mitigation Planning**

**Proposer Questions and DHH Responses**

10. In Part V: Proposal and Contractual Terms, Item A.7 requires all contractors to procure, submit and maintain either a Performance Bond or an irrevocable letter of credit. This is highly unusual for a Consulting contract. Is this an absolute requirement for this project/contract?

*Yes, this is the customary and recommended practice for the Department of Health and Hospitals. There are three approaches available: the Performance Bond, the irrevocable letter of credit or a 10% retainage from all billings under the contract.*

11. In Attachment C: DHH CF-1, Item 11, it is stated that use of subcontractors requires prior written approval of the Department. If subcontractors are listed in the proposal, and the proposal is approved, does this constitute prior approval of subcontractors, or are additional approvals required? If additional approvals are required, where can the approval requirements and process be found?

*After the winning proposal is selected, additional approvals are required during the contract negotiation phase for the use of sub-contractors. The successful bidder will submit all agreements with sub-contractors as attachments to the contract.*

12. In Attachment C: DDH CF-1, Item 19, specific indemnity language is provided. Is it possible to modify this language on a basis acceptable to our insurer?

*Minor changes may be negotiated after the contract is awarded, although the intent of the provision must remain intact.*

13. Page 5 of the RFP says that the deadline for proposals is April 26, 2006. On page 15 of the RFP it says that the deadline for proposals is 4 pm April 25, 2006. Which is the correct deadline?

*We apologize for the inconsistency. The deadline is April 26, 2006 at close of business which is 4:30 p.m., CDT.*

14. Will you be distributing the questions and answers submitted by other bidders?

*All questions posed by all bidders and our responses are included in this document.*

**Department of Health and Hospitals  
Request for Proposals for Consulting Services  
Pre-Hazard Mitigation Planning**

**Additional Proposer Questions and DHH Responses**

1. In Part II, Project Overview, item A, it is noted that the contractor will identify objective factors and criteria pertinent to the decision to evacuate healthcare facilities or shelter in place and will provide a decision-making tool designed to assist local community leaders in areas prone to natural disasters. There are various ways to approach this requirement, from applying an existing decision tool to creating one specific to DHH needs. Does the DHH have a specific decision-making tool in mind for this effort, and if so, what is it?

*DHH did not identify a specific decision-making tool. We expect the contractor to recommend and use the most appropriate tool, be it an adaptation of an existing one or a new tool.*

2. In Part II: Project Overview, item B, time estimates are provided to assist those submitting proposals in determining the number of staff to assign to the project. It is noted that DHH will provide a listing of the facilities, and that scientific sampling techniques may be use, except where DHH designates a limited number of specific facilities to be reviewed. However, to provide more accurate estimates of staffing needs, it would be helpful to have more detailed data, such as the total number of buildings, and location, square footage, use and occupant population per building – particularly as related to specific facilities to be reviewed. Can this information be provided for the proposal preparation process?

*The names and street addresses of nursing homes, hospitals and intermediate care facilities for the mentally retarded that are licensed by the Department of Health and Hospitals can be found at [www.dhh.louisiana.gov](http://www.dhh.louisiana.gov) . Click on "Providers," and you may select particular parishes or regions of the state. Details on square footage are not readily available.*

*Additionally, we are providing lists of these facilities with the number of beds in each. These lists can be found at [www.dhh.louisiana.gov/publications.asp](http://www.dhh.louisiana.gov/publications.asp) with the RFP.*

*We expect bidders to indicate an approximate sample size or percent of samples to be assessed or describe methodologies that might be used to determine sample size. We will consult with the winner in the selection of specific sites to review as a part of their sample.*

3. In Part II: Project Overview, item B.1, reference is made to hazard vulnerability assessment. There are various ways to approach this requirement, from applying a specific hazard vulnerability assessment tool or method, to creating one specific to DHH needs. Does the DHH have a specific hazard vulnerability assessment tool or method in mind for this effort, and if so, what is it?

**Department of Health and Hospitals  
Request for Proposals for Consulting Services  
Pre-Hazard Mitigation Planning**

**Additional Proposer Questions and DHH Responses**

*DHH did not identify a specific tool/method with respect to the hazard vulnerability assessment. We expect the contractor to recommend and use the most appropriate tool, be it an existing one or a new tool.*

4. In Part II, Project Overview, item B.4, a time estimate of six weeks is provided for the Expert and Constituent Reviews. If there is difficulty in scheduling meetings within that time period, due to key DHH and DHH-invited scientists/technical experts being unavailable, will it be acceptable for the time period to be extended, or will DHH require the review to go forward with only those persons who are available?

*DHH will work with the successful bidder/contractor to assure availability of DHH staff and scientists/technical experts so that work progresses smoothly, swiftly and within the six-week period. If we fail to do so, we may grant an extension, but it is our intent that the work be accomplished within the estimated timeframe.*

5. In Part V: Proposal and Contractual Terms, item A.7 requires all contractors to procure, submit and maintain either a Performance Bond or an irrevocable letter of credit. In our experience, this is unusual for a Consulting contract. Is this an absolute requirement for this project/contract?

*Answered previously.*

6. In Attachment C: DHH CF-1, item 11, it is stated that use of subcontractors requires prior written approval of the Department. If subcontractors are listed in the proposal, and the proposal is approved, does this constitute prior approval of subcontractors, or are additional approvals required? If additional approvals are required, where can the approval requirements and process be found?

*Answered previously.*

7. In Attachment C: DDH CF-1, item 19, specific indemnity language is provided. Is it possible to modify this language on a basis acceptable to our insurer?

*Answered previously.*

8. Is there a budget estimate available for this project, and if so, can it be provided?

*Answered previously.*

**Department of Health and Hospitals  
Request for Proposals for Consulting Services  
Pre-Hazard Mitigation Planning**

**Additional Proposer Questions and DHH Responses**

9. Are there any specific cost limitations which have been pre-determined, such as limits on airfares, accommodation, meals / per diem, billing rates, etc., and if so, can this information be provided?

*State travel regulations can be found at [www.doa.louisiana.gov/osp/Travel/TravelOffice.htm](http://www.doa.louisiana.gov/osp/Travel/TravelOffice.htm).*

*Should contract negotiations result in payment of travel expenses on a cost-reimbursement basis, we may only pay within these regulations. As stated in the RFP, however, we would prefer to make payment on the basis of deliverables, in which case travel expenses would be covered within the total amount paid.*

10. Can the successful contractor retain rights to the intellectual property that is created as part of this effort?

*Typically, a private entity may not retain property rights when public funds are used. Any document, plan or other product created pursuant to the contract will become the property of the State of Louisiana, Department of Health and Hospitals. There may be room for some negotiation during the contractual process subject to limitations in state law.*

**Hospitals Located in Southern Louisiana Parishes.**

The parishes represented here are located in whole or in part below Interstates I-10 and I-12.

All of the facilities operating within a particular parish are listed, whether a facility lies above or below the Interstate.

Consequently, the number of facilities listed here may be an over-estimate of the total.

**Nursing Homes Located in Southern Louisiana Parishes.**

The parishes represented here are located in whole or in part below Interstates I-10 and I-12.

All of the facilities operating within a particular parish are listed, whether a facility lies above or below the Interstate.

Consequently, the number of facilities listed here may be an over-estimate of the total.
